Nikko M. Puno

Cogon West, Carmen, Cebu, Philippines
Phone: 0994-942-5943
Email: nikkopuno0218@gmail.com
Web: https://nikkopuno0218.wixsite.com/myweb

Objective:

To gain valuable hands-on experience and apply my technical knowledge in a real-world environment through an internship in the field of mechatronics, automation, or embedded systems. I aim to contribute to a forward-thinking company while continuing to grow professionally and technically.

Education:

Bachelor of Science in Mechatronics
Cebu Technological University – Danao Campus
Expected Graduation: 2026

Projects:

• **ESP8266 Web Server for Sensor Monitoring**
Created a two-page real-time web interface using ESP8266 to monitor ultrasonic sensor distance and control ON/OFF devices. Designed interactive buttons, status indicators, and glowing text effects using HTML and CSS.

• **Miniaturized Packaging Model (Research Project)**
A collaborative thesis project developed using PLC programming to design and simulate a small-scale packaging system. The goal of this project was to serve as an educational kit to help both instructors and students gain practical experience in automation, system flow control, and troubleshooting.

Technical Skills:

Microcontroller Programming: ESP8266, Arduino
Sensor Integration: Ultrasonic, DHT22Web Interface
Design: HTML, CSS (basic)Automation & Control: Basic PLC Programming, Troubleshooting
Electronics: Circuit Design, Wiring, System Troubleshooting
IoT & Embedded Systems: Familiar with Real-Time Applications
Programming Languages: Beginner-level C++

Tools & Software:

Arduino IDE, Visual Studio Code, Microsoft Office Suite

Soft Skills:

Teamwork, Problem-Solving, Communication, Time Management, Fast Learner
